Understanding World War I

World War I, also known as the Great War, lasted from 1914 to 1918 and involved many of the world's great powers, which were divided into two main alliances: the Allies and the Central Powers. The war

was triggered by the assassination of Archduke Franz Ferdinand of Austria and escalated due to a complex web of alliances, militarism, imperialism, and nationalism. The conflict saw unprecedented levels of destruction and loss of life, with estimates of around 16 million deaths and 21 million wounded.

Key battles such as the Battle of the Somme and the Battle of Verdun exemplified the brutal trench warfare that characterized much of the conflict. The introduction of new military technologies, including tanks, airplanes, and chemical warfare, transformed the nature of combat. The war ended with the signing of the Treaty of Versailles in 1919, which imposed heavy reparations on Germany and redrew the map of Europe, laying the groundwork for future conflicts.
